Official Software License Agreement

Product	IUS DX-1 - Official Drum Machine and Rhythm Intelligence Engine
Document	Official Software License Agreement and Terms of Use
Version	v1.0 - Effective 13 May 2026
Licensor	IUS Music and the lawful owner(s) of the IUS DX-1 software, codebase, designs, artwork, branding, assets, documentation, and related intellectual property
Contact	IUSMUSICS@GMAIL.COM
Package use	This PDF is intended to be included unchanged in official IUS DX-1 packages, installers, downloads, trial builds, full builds, source distributions, plug-ins, standalone applications, manuals, and update bundles.

IMPORTANT: READ BEFORE INSTALLING, COPYING, COMPILING, LOADING, ACTIVATING, OR USING IUS DX-1.

By downloading, installing, copying, compiling, loading as a plug-in, launching as a standalone application, activating a trial, accessing a source package, or otherwise using IUS DX-1, you agree to this Software License Agreement. If you do not agree, do not install, copy, compile, load, activate, access, or use the Software.

1. Definitions

For this Agreement, the following terms apply:

- Software means IUS DX-1, IUS DX-1 Limited Trial Demo, and all related standalone applications, plug-ins, binaries, source code, build files, scripts, installers, updates, patches, packages, user interfaces, graphics, icons, logos, images, audio assets, presets, soundbanks, models, algorithms, documentation, web assets, and all derivative or related materials supplied by or for IUS Music.
- Licensor means IUS Music and the lawful owner(s) of the Software and related intellectual property.
- Licensee means any individual or entity that downloads, receives, installs, copies, compiles, activates, loads, executes, uses, evaluates, tests, or accesses the Software.

- Trial Build means any time-limited, online-validated, demonstration, beta, test, or evaluation version of the Software. A 24-hour Trial Demo may expose the same customer-facing feature set as the full build while the trial is active.

- Authorized Package means a package, installer, build, download, update, or source distribution released or expressly approved by the Licensor.

2. Ownership and reservation of rights

The Software is licensed, not sold. The Licensor retains all ownership, copyright, trade secret, design, database, trademark, goodwill, and other intellectual property rights in and to the Software. No ownership rights are transferred by download, installation, compilation,

activation, purchase, trial access, or use.

All rights not expressly granted in this Agreement are reserved by the Licensor. The Software is protected by copyright law, trade secret law, contract law, trademark law, database rights, design rights, unfair competition law, anti-circumvention law, and other applicable laws.

3. Limited license grant

Subject to strict compliance with this Agreement and any applicable purchase, subscription, trial, or written license terms, the Licensor grants the Licensee a limited, revocable, non-exclusive, non-transferable, non-sublicensable license to install and use the Software only for the Licensee's own lawful music creation, evaluation, testing, or production purposes.

The Licensee may not exceed the license term, user count, device count, subscription level, trial limit, build scope, or technical restrictions supplied with the relevant Authorized Package.

4. Strict restrictions

Except where mandatory law expressly prohibits the restriction, the Licensee must not, and must not allow any third party to:

1. reverse engineer, back-engineer, decompile, disassemble, unpack, translate, reconstruct, inspect memory to derive source code or algorithms, or otherwise attempt to discover the Software's source code, architecture, algorithms, models, trade secrets, protection mechanisms, or internal design;
2. copy, reproduce, publish, upload, transmit, distribute, sell, resell, rent, lease, lend, sublicense, host, mirror, share, or make available the Software or any part of it without prior written permission from the Licensor;
3. modify, patch, adapt, port, merge, fork, create derivative software, rebrand, reskin, remove branding, remove watermarks, remove copyright notices, or create a competing or replacement product from the Software;
4. circumvent, disable, bypass, spoof, alter, attack, emulate, or reset any activation, trial, online validation, subscription, device signature, time limit, telemetry, packaging, protection, update, watermark, or access control mechanism;
5. extract, scrape, reuse, train on, clone, imitate, package, or redistribute the Software's code, user interface design, workflow, icons, artwork, logo, soundbank structure, sample mapping, model design, rhythm intelligence logic, pattern generation logic, documentation, or database schema;
6. use the Software, code, screenshots, user interface, audio assets, documentation, or package structure to train, fine-tune, evaluate, benchmark, or build any artificial intelligence model, code-generation system, music-generation system, rhythm engine, competing drum product, or derivative commercial tool without written permission;
7. remove, obscure, alter, or falsify any copyright, trademark, legal notice, license file, version identifier, attribution, contact information, package signature, or ownership marker;
8. use the Software for unlawful activity, infringement, malware, unauthorized access, deception, fraud, or any activity that harms the Licensor, users, platforms, servers, or third-party rights.

5. Source code and build packages

If a source code package, project file, patch, script, build system, or development bundle is provided, it remains proprietary and confidential unless a separate written agreement signed or expressly issued by the Licensor says otherwise. Access to source code does not grant any

right to publish, redistribute, sublicense, sell, fork, open-source, rebrand, or reuse the source code or design.

The Licensee may compile source code only for the purpose expressly allowed by the Licensor. Any compiled output is subject to this Agreement. Unauthorized compiled copies, derivative builds, modified binaries, modified plug-ins, cracked packages, unofficial installers, or redistributed builds are prohibited.

6. Trial, demo, beta, and limited builds

Trial Builds are provided only for evaluation during the permitted trial period. During an active 24-hour Trial Demo, the Trial Build is intended to expose the same customer-facing workflow as the full build, including Lab, private models, soundbanks, generation, arrangement, export, and runtime features. Trial access may require internet connectivity, server-side validation, email verification, device or system signature validation, IP or abuse-risk checks, and server-controlled time. The app is not authorized to decide, extend, reset, or override trial status locally.

A Trial Build may be limited to one activation per email address, device, system signature, or other risk marker. Attempting to reinstall, clone, virtualize, spoof hardware, modify system identifiers, alter clocks, block online checks, patch binaries, edit databases, replay requests, use disposable or fraudulent identities, or otherwise obtain additional trial time is prohibited.

The Licensor may deny, revoke, throttle, block, or terminate trial access for abuse, suspected abuse, security risk, fraud, excessive requests, unauthorized redistribution, or breach of this Agreement.

7. Full, paid, subscription, and commercial use

A paid, commercial, or subscription license permits only the usage rights specifically granted at purchase or in the applicable written terms. Unless expressly permitted in writing, the Licensee may not transfer a license, share an account, share activation credentials, resell access, offer the Software as a hosted service, include it in a competing product, or distribute it to clients or third parties.

The Licensor may require activation, server validation, subscription status checks, update checks, or account checks for continued access. Failure to pay, chargeback, fraud, breach, or attempted circumvention may result in suspension or termination.

8. Music outputs and user content

The Licensee retains rights in original musical works created by the Licensee, subject to any third-party sample, soundbank, loop, library, or content licenses that may apply. This Agreement does not transfer ownership of the Software, presets, engine, code, workflows, designs, models, soundbanks, or included assets to the Licensee.

The Licensee must ensure that all imported sounds, samples, loops, MIDI, projects, and other content used with the Software are lawfully obtained and licensed. The Licensor is not responsible for unauthorized third-party content used by the Licensee.

9. Branding, trademarks, and visual design

IUS DX-1, IUS Music, the Software name, logos, icons, drum-machine artwork, user interface layouts, screen designs, product identity, button styling, theme treatment, documentation style, package naming, and related brand assets are proprietary. The Licensee receives no trademark, branding, endorsement, or design rights.

No party may use the Licensor's names, logos, screenshots, interface designs, product identity, or branding to imply endorsement, partnership, authorization, resale rights, or official status without written permission.

10. Third-party components

The Software may include or interact with third-party libraries, frameworks, SDKs, operating-system components, plug-in formats, compilers, fonts, hosting services, payment services, email services, database software, or other components. Those components may be governed by their own licenses. This Agreement does not override mandatory third-party license notices or rights, but it governs the Licensor's proprietary code, designs, assets, packaging, documentation, and product identity.

11. Privacy, activation, and online services

The Software may communicate with Licensor-controlled or authorized servers for activation, trial validation, email verification, subscription checks, security checks, abuse prevention, update checks, telemetry necessary to operate licensing, and diagnostics. Data may include email address, masked email, activation status, server time, device or system signature, product version, request status, IP-derived risk information, and related technical metadata.

The Licensee must not interfere with, spoof, replay, overload, scrape, probe, attack, or reverse engineer licensing servers, APIs, databases, email systems, or validation endpoints.

12. No warranty

To the maximum extent permitted by law, the Software is provided 'as is' and 'as available' without warranties of any kind, whether express, implied, statutory, or otherwise. The Licensor disclaims warranties of merchantability, fitness for a particular purpose, title, non-infringement, uninterrupted operation, error-free operation, compatibility, audio accuracy, timing accuracy, data retention, or availability of online services.

The Licensee is responsible for backups, project preservation, system compatibility, DAW compatibility, audio routing, security, compliance, and verifying that the Software is suitable for the Licensee's intended use.

13. Limitation of liability

To the maximum extent permitted by law, the Licensor will not be liable for indirect, incidental, special, consequential, exemplary, punitive, or lost-profit damages, including loss of revenue, loss of business, loss of music projects, loss of data, loss of goodwill, production downtime, distribution losses, platform rejection, device failure, studio interruption, or claims by third parties, even if advised of the possibility of such damages.

Where liability cannot be excluded, the Licensor's total aggregate liability is limited to the amount actually paid by the Licensee to the Licensor for the specific Software license giving rise to the claim during the twelve months before the event giving rise to liability, or the minimum amount permitted by applicable law, whichever is greater.

14. Termination

This Agreement terminates automatically if the Licensee breaches any term. Upon termination, the Licensee must immediately stop using the Software and delete all copies,

builds, installers, source packages, derived binaries, activation credentials, documentation, and extracted assets in the Licensee's possession or control, except where retention is required by law.

Sections concerning ownership, restrictions, source code, no reverse engineering, confidentiality, trial circumvention, branding, third-party components, warranty disclaimers, limitation of liability, enforcement, and governing principles survive termination.

15. Enforcement and infringement

Unauthorized copying, redistribution, reverse engineering, cracking, circumvention, extraction, derivative use, rebranding, or commercial exploitation may cause irreparable harm. The Licensor may seek injunctive relief, takedowns, account termination, damages, costs, and other remedies available under law or contract.

To report infringement, unauthorized redistribution, cracked versions, imitation products, misuse of branding, or license abuse, contact: IUSMUSICS@GMAIL.COM.

16. Export, compliance, and lawful use

The Licensee must comply with all applicable laws, regulations, export controls, sanctions, consumer laws, privacy laws, and third-party rights. The Software may not be used, exported, or transferred in violation of applicable laws.

17. Changes to license terms

The Licensor may update this Agreement for future versions, updates, downloads, or online services. Continued use of updated Software, online services, or new packages after updated terms are made available constitutes acceptance of the updated terms, unless prohibited by mandatory law.

18. Severability and interpretation

If any provision is found unenforceable, the remaining provisions remain effective. The unenforceable provision will be interpreted or modified to the minimum extent necessary to make it enforceable while preserving the original intent. Headings are for convenience only. Any ambiguity will not be interpreted against the Licensor merely because the Licensor supplied this Agreement.

19. Governing principles

This Agreement is governed by applicable contract, copyright, trade secret, database, design, anti-circumvention, and intellectual property laws. Mandatory consumer, interoperability, or statutory rights that cannot legally be excluded remain unaffected, but all restrictions apply to the maximum extent permitted by law.

20. Entire agreement

This Agreement, together with any written order, invoice, subscription terms, activation terms, authorized support terms, or written agreement issued by the Licensor, is the entire agreement concerning the Software. It supersedes prior oral or written statements concerning the Software unless a separate written agreement expressly states that it overrides this Agreement.

OFFICIAL PACKAGE NOTICE

This license file must remain with all official IUS DX-1 packages. Removing, altering, obscuring, or misrepresenting this license file, copyright notices, branding, or ownership markers is prohibited.
